TARUN KUMAR

taruntomar9084@gmail.com | +91-8791374431 | LinkedIn | Aligarh, Uttar Pradesh

OBJECTIVE

Final-year B.Tech student with analytics internship experience in SQL, Python, and BI dashboards. Skilled at breaking business questions into metrics, running analysis, and turning findings into actions. Keen to apply AI/LLM tools to business analytics.

EDUCATION

Dr B. R. Ambedkar National Institute of Technology (NIT), Jalandhar *Aug 2023 – Present*

Bachelor of Technology

EXPERIENCE

Business Analyst Intern – Codec Technologies India *Jun 2025 – Jul 2025*

Stack: Python, Pandas, NumPy, Tableau, Excel, PowerPoint

- **Business Requirement Gathering & Delivery:** Led end-to-end delivery of 2 client-facing analytics projects - an HR Analytics Dashboard and a Sales Performance Dashboard - gathering business requirements from stakeholders and executing the full project lifecycle from raw data ingestion to executive-grade visualization.
- **Process Mapping & Reporting:** Designed and published interactive Tableau dashboards surfacing revenue analysis, regional sales KPIs, and performance metrics to leadership, improving visibility into business processes across categories and geographies.
- **Root Cause & Gap Analysis:** Performed systematic data wrangling, cleansing, and EDA using Python, Pandas, and NumPy across 3 business domains to identify gaps and root causes of reporting inconsistencies, standardizing datasets and reducing downstream errors.
- **Process Improvement:** Streamlined data workflows and ETL procedures to drive business process improvement, ensuring reproducible reporting for recurring business reviews.

Data Analytics Intern – Edgenius Skillfied Mentor Pvt. Ltd. Dec 2025 – Mar 2026

Stack: Python, Pandas, SQL, Tableau, Power BI, Scikit-learn

- **Data Analysis & KPI Analysis:** Conducted statistical and regression analysis on a 50,000+ record dataset to identify patterns and growth opportunities, aligning KPI analysis with organizational objectives to support data-driven decision-making.
- **Documentation & Presentation:** Developed and delivered interactive BI dashboards, MIS reports, and stakeholder-ready presentations (Tableau, Power BI, PowerPoint), translating complex datasets into decision-ready documentation for cross-functional teams and business reviews.
- **Stakeholder Collaboration:** Performed customer segmentation and feature-importance analysis to surface actionable insights, presenting findings directly to cross-functional stakeholders and leadership.
- **Stakeholder Management:** Collaborated with business units to align KPI definitions and standardize reporting and data-governance practices, strengthening documentation discipline across teams.

SKILLS

Business Analysis: Business Process Improvement, KPI Analysis & Design, Business Modelling, Documentation, Data Interpretation

Visualization & BI Tools: Business Intelligence Tools (Tableau, Power BI), Excel

Programming & SQL: Python (Pandas, NumPy), SQL (MySQL)

Machine Learning: Scikit-learn, Supervised, Unsupervised, Ensemble, Tuning, Feature Engineering, A/B Testing

Tools & other libraries: Excel, Google Sheets, Jupyter Notebook, Git & GitHub, Streamlit, VS Code, GenAI Tools

Communication & Soft Skills: Data Storytelling, Stakeholder Communication, Requirement Gathering, Critical Thinking.

PROJECTS

HR Analytics Dashboard - *Python, Pandas, Tableau*

- Designed a self-serve BI dashboard tracking employee performance, attrition risk, and workforce productivity across departments, removing analyst dependency for routine reporting and supporting process improvement initiatives.

Census Analytics Web-App - *Python, Streamlit, MySQL, Plotly, SQL, Git & GitHub (link)*

- Developed and deployed a full-stack geospatial & demographic analytics dashboard on India's 2011 Census dataset (500+ districts, 70+ variables) using Streamlit Cloud, Plotly, and MySQL, with ETL preprocessing, data normalization, and null-value imputation to build a query-optimized reporting schema.
- Implemented multi-dimensional analysis across literacy, population density, sex ratio, and workforce distribution with interactive filters, drill-down views, choropleth maps, and time-series visualizations for state- and district-level insights.
- Transformed complex raw census data into intuitive visual narratives, enabling non-technical stakeholders to explore regional disparities and demographic trends through a live, interactive web application.

Sales Forecasting Model - *Python, Scikit-learn, Pandas*

- Built a supervised regression model (Random Forest) to forecast monthly revenue using historical sales, seasonality, and product category variables, reducing forecast error (RMSE) by 18% over baseline through feature engineering (lag variables, rolling averages) and presenting actual-vs-predicted trends to non-technical stakeholders.

CERTIFICATES

- Master Data Analysis – Udemy (2025): Python, SQL, Tableau, Power BI, Excel, Statistics, AWS
- GenAI Powered Data Analytics - Tata iQ (Forage), 2026: EDA, Predictive Analytics, Process Automation using GenAI tools

ACHIEVEMENTS & ADDITIONAL

- Technex 2025, IIT BHU: 3rd place and a top-10 finish across 2 intercollegiate technical events.
- Bronze medal, 4×100m relay, NIT Jalandhar Athletics Fest.
- Class Representative (B.Tech 3rd year) and Hostel Discipline Committee Member: conflict resolution, and team collaboration.
- National Cadet Corps (NCC), 21 PB BN Kapurthala (Jul 2024 – Aug 2025): leadership and discipline.
